

GENERAL ELECTRIC

Standard Pick-up Ratings (Amperes)
50, 70, 100, 140, 200, 280, 400, 560

Frequency Rating
60 Hertz

**TWO-CYCLE POWER-CLASS RECLOSER
GROUND TRIP "CG" CONTROL**

Clearing Time-current Curves at 25 C Ambient

PICK-UP tolerance is plus or minus (\pm) 10%.
CG TIME DELAY is an average curve with plus or minus (\pm) 10% time tolerance.
CG1, CG2 and CG3 INSTANTANEOUS curves are maximum curves.
Minimum curves are 25% lower in time for times above 0.1 seconds and include allowance for current asymmetry.

GES-6411A

NOTE: When ground-trip accessory is specified, the appropriate ground-trip curve is predetermined by the phase curve. For example, if C2 phase curve is selected, CG2 would be the ground curve. (See GES-6408A for phase curve characteristics.)
